# Recent Experiences Presentation to ITSA

September 25, 2017

Canada

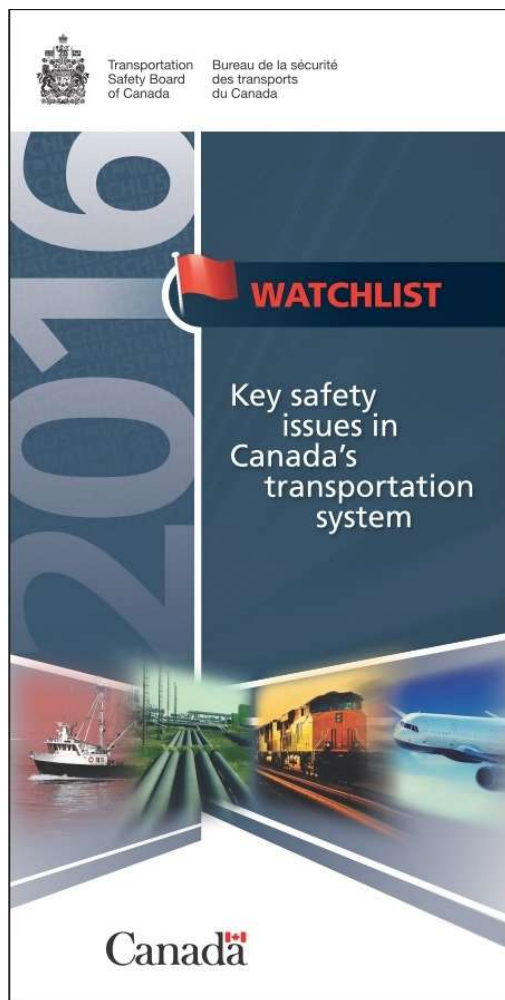

## Outline:

- Watchlist 2016
- Scorecard of TSB recommendations
- Slow progress addressing TSB recommendations
- Update on working group: reviewing our processes and products

# Watchlist 2016

**Safety management and oversight**

**Slow progress addressing TSB recommendations**

**Commercial fishing safety**

**Transportation of flammable liquids by rail**

**Following railway signal indications**

**On-board voice and video recorders**

**Fatigue-management systems for train crews**

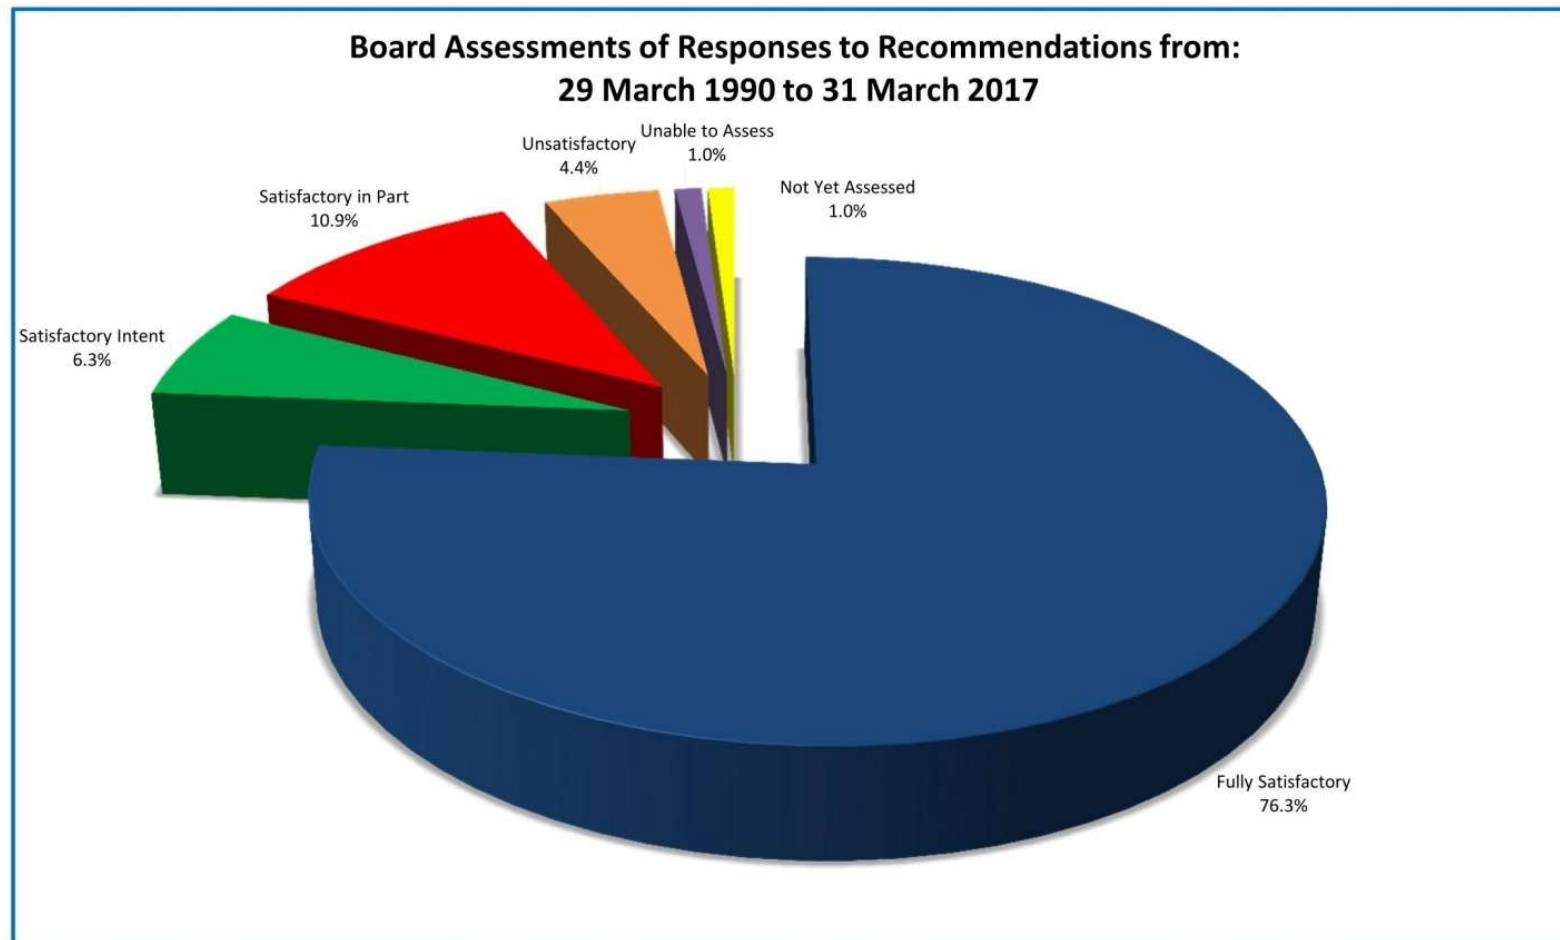

**Unstable approaches**

**Runway overruns**

**Risk of collisions on runways**

# TSB recommendations: the score so far

## Slow progress addressing TSB recommendations

*“Transport Canada action to address TSB recommendations is too slow.”*

Mode	10–14 years	15–19 years	More than 20 years	Total
Air	3	4	32	39
Rail	1	1	1	3
Marine	3	1	6	10
<b>Total</b>	<b>7</b>	<b>6</b>	<b>39</b>	<b>52</b>

**TSB recommendations active for 10 years or more, by mode**

## Slow progress (continued)

### This issue will remain on the Watchlist until:

- Transport Canada makes a clear commitment to take action on the outstanding TSB recommendations with which it agrees;
- the Government of Canada improves and accelerates the process for taking action on safety-related recommendations; and
- there is a marked reduction in the backlog of outstanding TSB recommendations, particularly those that will bring Canada back in line with international standards.

## Review of Investigation Process and Products

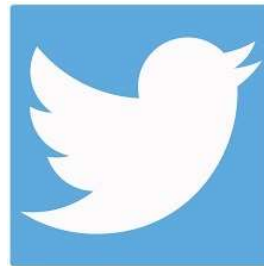

- New Occurrence Classification Policy
- Introducing new class 4 – small investigations with short reports
- Review of investigation process to streamline it
- More structured project management of investigations
- Publish more frequent investigation updates
- All safety products will be released publicly
