ITSA – Recent experiences

Baku, Azerbaijan

14 May, 2018

Canada

New Recommendations

Air

- Substance abuse program to reduce risk of impairment of persons engaged in safety-sensitive functions (A17-02).
- Mandatory lightweight recording systems for commercial and private business aircraft operators (A18-01).

Rail

- Improvement of railway crossings designated for use by persons with assistive devices (R18-01).

Marine

- Fatigue management plans and training for watchkeepers (M18-01, M18-02 – **not yet released publicly**).

New Occurrence Classification Policy

Class	Investigation Type	Level of Effort	Level of Investment	Investigation Process
1	Safety Issue	Very high	Very high	Complex
2	Complex	Very high	Very high	Complex
3	Detailed	High	High	Medium
4	Limited Scope	Medium	Medium	Simple
5	Data Gathering	Low	Low	Data gathering

New Class 4 Occurrences

- Class 4 Occurrence (Limited Scope Investigation)
- Much shorter reports, faster to produce, with fewer resources used.
- Content: mostly factual, limited analysis, no findings or recommendations

Challenges

- Financial
- Legal
- Relationship with Indigenous communities
- Employee survey results
